PROFESSIONAL SUMMARY

Fresh Computer Science graduate from FAST University with experience in Full Stack Development, Software Testing, and AI-powered web applications. Skilled in Next.js, TypeScript, MongoDB, FastAPI, and quality assurance practices, with a strong passion for building reliable and scalable software solutions.

EXPERIENCE

AI Engineer Intern — Nexium

Jul 2025 – Aug 2025

- Built and shipped three production web apps (Quote Generator, Blog Summarizer, Recipe Generator) using Next.js, TypeScript, Tailwind CSS, ShadCN UI, and MongoDB/Supabase.
- Integrated OpenAI API for AI-powered recipe generation and external APIs for automated blog summarization; deployed all apps on Vercel.

Teaching Assistant – Operating Systems — FAST University Karachi

Feb 2026 – May 2026

- Assisted course instructor with tutorials and one-on-one student support throughout the semester.

PROJECTS

Pakvel – AI-Powered Travel Itinerary Generator (FYP) | React Native, Gemini AI, Groq, JWT, RAG, FastAPI, Postman

- Built an AI travel planning platform generating personalized itineraries using LLM integration and RAG based on user preferences, budget, and interests.
- Integrated third-party AI APIs, real-time travel features, JWT auth, and role-based access for Travelers and Brokers; validated backend via Postman API testing.

Recipe Generator | Blog Summarizer | Quote Generator | Next.js, TypeScript, OpenAI API, Supabase, MongoDB, Vercel

- AI-powered recipe app with full CRUD via MongoDB; Blog Summarizer with dual-database (Supabase + MongoDB); Quote Generator with save/favorite/share features — all deployed on Vercel.

Book Bank Management System | SQL, DBMS

- Designed normalized relational schema; implemented CRUD operations, query optimization, and report generation for inventory, issuance, and return tracking.
